WO 02/11816 discloses a dual cavity respirator comprising both an orinasal mask and an outer face-sealing mask. The respirator of WO 02/11816 also comprises an ocular mask in gaseous communication with the orinasal mask.

The valve assembly according to claim 1 includes a purge outlet means connectable to an air pressure supply means and air deflection means providing a curtain of air above the valve mechanism.

The air deflection means prevents air from mixing in the immediate vicinity of the valve mechanism and thus causing potentially harmful turbulent flow.

Such air deflection means have not been disclosed or suggested in the documents cited in the search report.
